SCHOOL OF Medicine

Graduating female doctors of recognized international standards
Background

Ahfad School of Medicine is a division of AUW, situated in Omdurman city. Established in 1990 and internationally accredited. Study period 6 years spread over 12 semesters distributed in three phases. The curriculum is based on blocks and modules of organ systems and themes. During the whole program; problem-based learning and community-oriented medical education are the main educational strategies to be adopted. Longitudinal courses

- Community Orientation Course (COC)
- Skills’ Training (SLT)
- Family Attachment Program (FAP)

The mission

The mission of the school is to provide quality medical education based on the valid modern educational methods and values. The school is adopting an educational system tallying with the international and national standards of medical education and medical practice to qualify female doctors. The school is fully committed to correlate the medical education with the medical practice through provision of training and education for the students and the health care providers at various levels of the health care delivery system.

The vision

The vision of the Ahfad School of Medicine is reflecting the overall vision of Ahfad University for Women in promoting female education and women development. The graduates of the school are educationally qualified, professionally and ethically competent to provide quality care responsive to the needs of the Sudanese individuals, families and communities.

Goals and Objectives

1. Education:

a) Basic medical education to graduate female doctors of recognized international standards and accepted by the Sudan Medical Council.
b) Continuous education for health personnel.
c) Postgraduate studies with special emphasis on the field.
d) Educate the community in matters related to health.

2. Service:

The school will be involved in service provision in agreement and collaboration with all levels of the health care delivery system in rural and urban areas. Ahfad health center is one of primary care services provided by the school of Medicine. Umbada teaching hospital is the secondary level of health services that is provided by the school. In addition to other specialized units in different hospitals.

3. Research:

The school is expected to implement research projects in collaboration with the health and other research institutes inside and outside Sudan. Such research should address the major community health problems.
